Subject: RE: Leviathan Mine - October 2016 Monthly Progress Report

EPA is currently reviewing the June 30, 2016 Leviathan Mine Database and preparing comments.

Perhaps we could do a phone call to discuss broadly, but one of EPA's questions is regarding the completeness of the database.

Is all data, validated/unvalidated/rejected included; and what historical data and data collected from other agencies is captured? How often updated and how?

I note that one of the items in the ARC monthly states:

- *Continued updating the Leviathan Mine Project Database with data from Atlantic Richfield and various agencies.*

Could ARC please provide a couple paragraphs with specific references clarifying what agencies data are included in the one complete project database?

Best Regards,

Lynda Deschambault
Environmental Scientist
USEPA Region 09
(415) 947-4183

Please be advised I may have limited access to email , therefore please be patient with any communication delays.
